# COACHES IN THE FIELD PROGRAM

## 'Space Awareness, Timing and Reading the Game'

This three hour workshop covers the roles of each position and the practical strategies for improving space awareness of players.

The concept of "timing" will also be covered using drills to emphasise when to read and cues to look for. By the end of this session coaches will be better equipped to teach their players how to work in combination with each other and be able to develop various options for advancing the ball down the court.

## 'Creating and using Space'

This program follows the seven step progression to develop player awareness and skill to create their own space, recognise their space and take their space with dominance.
